Agenda

- Process & Form Designer
- Data Model
 - Transaction Tables
 - Master Tables
 - Integration Approach (Staging Tables)
- BRMS
- Template Generation
- Integration Adaptor
- Spreading
- Reports
- Implementation

Guideline

- Release Details

Process & Form Designer

- Process & Form Overview
- Tab & Sub-Tab Concept
- Control Sets
- Advance List Views
- Custom icons on Tabs
- Custom CSS for Summary View
- DB Linking for Dropdown Masters
- SubForms

Data Model

- Important Transaction Tables
- Important Master Tables
 - Product Setup
 - Control Set
 - Document Generation
 - Decision
- Important Sequence
 - LOSID, Address ID, CIF, Loan & Limit ID & Collateral ID
- Staging Tables for integration.
- Loan Record

Data Model & Form Linking

- Queue Variables
 - Primitive (Wfinstrumenttable)
 - Complex
 - Table & View use cases
 - Array use case
 - Nested Tables
 - Data on Demand & Rule on Queue Variables
- Read and Modify Rights

CLOS Queue Variables Relations

The screenshot displays the CLOS Queue Variables Relations configuration interface. The main window shows a process flow with three steps: Task Entry, Task Number, and Assessment. Two dialog boxes are open for configuration.

Define Mapping Dialog:

- Variable: Q_Applicants_Details
- Mapped Object: Table (selected)
- Table: NG_CLOS_Applicants_Details
- View: (empty)
- Sort Columns: insertionorderid
- Sort Order: ASC

Define Relation Dialog:

- Variable Name: Address_Details_ListView
- Parent Table Field: ParentTableId
- Child Table Field: childmapping
- System generated keys:
 - ☒ Parent Relationship Key
 - ☐ Child Relationship Key

The background interface includes a Project Tree on the left, a top navigation bar with Business Admin, Process Designer, and User Desktop, and a bottom status bar with Abstract View and BPMN View.

■ BRMS Rules

- **Deviations** – Any exception from the Credit policy is raised as a deviation
 - Can be Auto (system generated) or Manual (raised by the user)
- **Deviation Matrix** – The deviation raised is routed to respective authority for an action (Approve/Reject)
- **Risk Rating** – Risk band is enabled to identify the risk associated with the application as per the risk weightages
- **Approval Matrix** – Route of the Case to the Sanctioning Authority (individual & Committee) for the Loan Application for an action(Approve/Reject)
